Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

***Election/Restrictions***

Applicant's election of Group II in the reply filed on 3/25/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 8, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Thornton.

Thornton discloses a conveyor defining a velocity (fig. 1); a force-measuring sensor (fig. 1); a restraint operably coupled to the sensor to measure a force applied to the restraint by a human subject (abstract); a controller configured to control the velocity of the conveyor based, at least in part, upon the force measured by the sensor (col. 10, lines 57 – et seq.)

As for claims 7, 9-11, Thornton further discloses a sensor coupled to the controller and adapted to detect the position of a human subject on the conveyor (col. 2, lines 57- et seq.), the restraint comprises a harness adapted to fit around a waist of a human subject (col. 2, lines 62-68), and a tether connecting the harness to the apparatus (col. 2, lines 62-68).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thornton in view of Carmein.

Thornton does not disclose a controller based upon a haptic equation.

Carmein discloses a treadmill controller based upon a haptic equation.

It would have been obvious to base Thornton's controller on a haptic equation, as it is well known as taught by Carmein, to base a treadmill controller on a haptic equation, as a means for controlling the parameters of a treadmill.

***Allowable Subject Matter***

Claims 8, 12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Slane discloses a device for determining the push/pull capabilities of a human subject.

Boyd et al disclose a method and apparatus for gait recording and analysis.
